

# SEE WHAT NEEDS TO BE IN YOUR FLEET'S YEAR-ROUND MAINTENANCE PLAN

Spring is a great time for a comprehensive checkup. Make a plan to:

- Examine tires and brakes
- Change oil and filters
- Examine belts
- Test the electrical system and lubricating moving parts

**SPRING**

**SUMMER**

Summer heat brings added stress to hard-working trucks. Take time to:

- Check the cooling system
- Test the A/C
- Clean the radiator
- Inspect the belts and hoses

**FALL**

Get ready for the big freeze before winter sets in. Prepare for cold weather by:

- Switch to winter-grade oil and antifreeze
- Check all lights and reflectors
- Inspect tires
- Test the block heater

**WINTER**

As the temperatures drop in fall, trucks need to be prepared. Schedule time to:

- Check antifreeze levels
- Inspect wipers
- Test battery health
- Examine fuel lines for leaks
